Tuition Reduction at Albert Einstein College of Medicine for Children of Qualified

EINSTEIN Faculty Employed Full Time by an Affiliate*

A. Children of qualified EINSTEIN faculty who are employed full time by an affiliated Medical Center will be considered for a tuition reduction based on the sustained contribution of the faculty member to the teaching and research missions of the College. This will be treated as special compensation to their faculty parent, in recognition of exceptional contribution to the academic mission.

Examples of contributions that will be eligible for consideration as the basis for a 50% tuition reduction include service as:

a. Leader of a Pre-clerkship Course
b. Director or Site Director of a required clerkship
c. Program Director of EINSTEIN-sponsored residency program in a department with a required clerkship
d. Principal Investigator on EINSTEIN NIH grants
e. Chair or Co-Chair of a standing College committee
f. University Chair of an academic department

In addition, consideration for a tuition reduction of $5000 per year will be given to a faculty member who has several, for example, as a small group facilitator or lab instructor in a pre-clerkship course, a preceptor for Introduction to Clinical Medicine, a preceptor or attending for an EINSTEIN required clerkship, an active mentor for EINSTEIN research trainees, a funded co-investigator on a major EINSTEIN grant, or an active member of a standing EINSTEIN committee at a level over and above the requirements of their departments and the basic expectations associated with an EINSTEIN faculty.

Although the titles and positions listed above make one eligible for consideration, they do not automatically confer this benefit. Each application will be reviewed by an Advisory Committee and evaluated in comparison with the activities normally expected of faculty members by both their Departments and their Hospitals. The award of the tuition reduction benefit will be based primarily on evidence of sustained contributions to the College’s teaching and research missions over and above the basic expectations associated with an EINSTEIN faculty appointment. Applicants may be asked to submit their teaching portfolios.
B. Faculty members who wish to be considered for tuition reduction for their children must submit an application to the Dean prior to the start of the academic year, detailing their academic activities. Since awards are given for a period of one year, the application must be resubmitted for each year that tuition reduction is requested.

The application must include the faculty member’s Social Security number because any tuition reduction based on this policy is considered to be a payment by the University subject to Federal, State and Local Income Taxes. A 1099 Form will be issued to each faculty member whose child is granted such a tuition reduction.

Applications are available in the Financial Aid Office, Van Etten Building, 2nd Floor, Room 230.

C. In the event that both parents of a matriculated student are EINSTEIN faculty members, a maximum tuition reduction of 50% will be allowed.

D. This policy applies only to tuition costs and not to fees, room, board, books and other discretionary charges. The 50% tuition reduction will be coordinated with allowances toward tuition costs from other sources including scholarships, fellowships, grants-in-aid, National Health Service Corps, an affiliate’s tuition assistance program, etc. All such allowances must be disclosed in the application for tuition reduction. The College’s 50% reduction of tuition will be decreased by the amount of any tuition support from other sources.

Participants eligible for a tuition reduction of $5000 will not be affected by this provision.

* This does not apply to faculty employed by YU who should consult with the EINSTEIN Faculty Tuition Office, Belfer Educational Center, Room 1209.
