This year, our Rare Disease Day celebration focuses on the stories of three families who have experienced having a child diagnosed with a rare disease. Discover what they’ve learned on their journey from diagnosis to the present, and consider how partnerships between family, clinicians & scientists, at academic centers like Einstein-Montefiore, can benefit all.

**Precision Medicine Meets Rare Disease**  
**The Family-Clinician-Scientist Partnership**

THURSDAY, FEBRUARY 27, 2020

Price Center/Block Research Pavilion  
LeFrak Auditorium  
2:00 – 4:45 PM

This year’s event will have three sessions featuring a family-physician-scientist team for each rare disease:

**Alpha-mannosidosis:** the Forsman family, Dr. Steven Walkley and Dr. Robert Marion  
**Gene DYNC1H1:** the Celiberti family, Dr. Melissa Wasserstein and Dr. Arne Gennerich  
**Gene KDM5C:** the Robl family, Dr. Julie Secombe and MSTP Student, Hayden Hatch

Moderated by Dr. Steven Walkley

Forchheimer/Main Street  
5:00 – 6:00 PM

Please join us for a poster presentation on rare disease from labs and clinics at Einstein/Montefiore and for informal discussions with our visiting rare disease families, along with refreshments and music by the Einstein Jazz Ensemble.

ALL ARE WELCOME!

Sponsored by the Rose F. Kennedy Intellectual and Developmental Disabilities Research Center
