How to disconnect and Reconnect YUWireless from an iPad

In order to reset your YUAD (mail) password, you will need to disconnect ALL mobile devices from YUWireless (because you sign into these devices using our YUAD login and password). You will also need to sign out of anywhere where you are signed in using your YUAD credentials. This may or may not include some automatic sign ins and any Password Managers that automatically sign you in.

**Disconnecting from YUWireless:**

1. Start your iPad and tap the Settings icon on the desktop.
2. If you have cellular service, tap General, then Cellular and turn Cellular Data off.
3. Tap General
4. Tap Wi-Fi
5. Tap the arrow next to YUWireless
6. tap the “Forget this Network” button

7. You should finish with this screen

8. Tap the “Wi-Fi” button to go back
To Reconnect to the YUWireless network after changing your password:

1. Tap the Settings icon on the desktop
2. Tap the General settings choice
3. Tap Wi-Fi and then tap YUSetup
4. Tap “Connect Me to YUWireless/YUDorm”
5. Be sure that you check the box accepting the End User License Agreement and then click the green Start button.

6. Tap YUWireless

7. Enter your YUAD username (mail username)

8. Tap Install

9. Enter your passcode (the one you use to unlock your device) and tap “Done”
10. Enter your new password you changed in OWA (your mail password) and tap “Next”

11. Tap Done

12. You should be brought back to the profiles screen with the YUWireless profile installed.

13. Press the home button to return to your home screen
