Inside This Issue

HISTORICAL PERSPECTIVE
History of the Department of Biochemistry
Four years in the making, this magisterial history follows the development over the years of the department of biochemistry at the Albert Einstein College of Medicine. Personal interviews and rich historical documentation bring to life the stories and personalities behind this fascinating department, which has served to shape the history of the medical college from the graduate and medical programs to the founding of EJBM.
See Page 2

CASE REPORT
A Rare Cystic Schwannoma of the Portal Triad
Schwannomas may be found anywhere in the body. This report details the rare case of a cystic schwannoma extending from the portal triad.
See Page 33

SYMPOSIUM REPORT
