Dear Einstein Community and Friends:

September 27, 2013 marked the 50th anniversary of the passing of Saul R. Korey, M.D., a founding faculty member of the College of Medicine and the namesake of our department of neurology – which he established during the eight years that he helped shape our institution.

Although he was only 45 at the time of his death, Dr. Korey left an indelible mark and invaluable legacy at Einstein that we will commemorate on Tuesday, November 12, 2013, D. Samuel Gottesman Library at 4pm.

Please mark your calendars and join us for “Remembering Saul R. Korey, M.D.: 50 Years, A Lasting Legacy,” when we will unveil a special exhibit and video detailing his contributions and influence still reflected at Einstein today.

We hope you will join us in remembering this great man, mentor, physician and scientist.

Sincerely,

Mark F. Mehler, MD, FAAN, FANA
University Chairman
The Saul R. Korey Department of Neurology
