

PhD

A Different Approach to Graduate Education

www.einstein.yu.edu/phd

Departments:

- Anatomy & Structural Biology
- Biochemistry
- Cell Biology
- Clinical Investigation
- Developmental and Molecular Biology
- Genetics
- Microbiology and Immunology
- Molecular Pharmacology
- Neuroscience
- Pathology
- Physiology and Biophysics
- Systems and Computational Biology
- And everything in between!

1st Year

- Graduate courses
- Three laboratory rotations
- Declare laboratory for thesis research
- Career Workshops

2nd Year

- Complete graduate courses
- Start thesis research
- Take qualifying exam
- Career Workshops

3rd-5th Years

- Full time thesis research
- Thesis defense
- Graduation
- Career Workshops

QUICK FACTS

Founded: 1957

Enrollment: 340 PhD students

Stipend: \$33,000

Tuition remission: for all years

Student profile: 55% female, 45% male; students from 28 states and 21 countries

Laboratories for PhD research: >200

Location: Bronx, NY

Graduate Programs in the Biomedical Sciences

Albert Einstein College of Medicine
OF YESHIVA UNIVERSITY

- The highest level of scientific achievement
- An institution that is among the top in the nation for research funding from the National Institutes of Health (NIH)
- More than 1,400 PhD graduates now employed in academia, industry, government, and private enterprise.

Inquiries

phd@einstein.yu.edu

Application process

Application online at website

PhD Admissions Timeline

Online PhD Application Open:
September 1 – December 15

PhD Application Deadline:
December 15

PhD Interview Dates:
January thru March

PhD Revisit (for accepted students):
late March (Julius Marmur Research Symposium)

Final Day for Accepted Students to Make Decisions:
April 15

PhD Orientation:
begins early August

Application deadline

December 15

GRE General Test required/ subject test not necessary

Prior research experience

Sustained research experience of one to two years; summer program experience is helpful.

Letters of recommendation

3 letters of recommendation

Academic requirements

Undergraduate courses in biology, general chemistry, organic chemistry, mathematics (including calculus), and physics, with advanced electives in biology, chemistry, and/or physics (a course in biochemistry is strongly recommended); or have completed an undergraduate engineering curriculum.

PhD interviews

Applicants whose training and performance qualify them for further consideration are invited to visit Einstein for an interview. Travel and hotel expenses will be paid by Einstein.
